

iSuite AI

Landing Page — Revised Copy & Structure

From first message to paid invoice.

AI Sales System for businesses that sell through conversations.

This document is the revised landing-page direction for the current iSuite AI page, based on the live landing page and the iSuite AI Sales Journey Guide.

iSuite AI, a product of MnT Future

01 — HERO

From first message to paid invoice.

iSuite AI is the AI Sales System that answers, qualifies, books, follows up and helps your team close — all the way to quotation, invoice and payment.

For businesses that sell through WhatsApp.

02 — THE PAIN

The lead came in. What happened after that?

- A customer messages at 11 PM. Nobody replies.
- A customer asks for a quotation. Someone says, “I’ll call you back.”
- Nobody follows up.
- A salesperson takes over and the customer has to explain everything again.

The lead wasn't lost at the ad. It was lost between the message and the sale.

03 — CORE PRODUCT STORY

iSuite AI does the sales work between the enquiry and the invoice.

One enquiry. One continuous sales journey.

01 Respond	Answer immediately, in the customer's language.
02 Qualify	Ask the right questions and record the answers.
03 Book	Check real availability and book the appointment.
04 Hand over	Give the right salesperson the full context.
05 Propose	Send products, packages and GST quotations.
06 Follow up	Keep the open deal moving without nagging.
07 Close & get paid	Quotation → Invoice → Payment.
08 Learn	Show which ads and conversations turned into customers.

04 — DIFFERENTIATOR

It doesn't stop at the reply.

Most systems help you get the conversation started. **iSuite AI keeps the deal moving.**

MESSAGE → QUALIFY → BOOK → HAND OVER → QUOTE → FOLLOW UP → INVOICE
→ PAYMENT

From first message to paid invoice.

05 — USP 1: IT SELLS, NOT JUST REPLIES

- Answer enquiries.
- Ask qualifying questions.
- Save customer details.
- Create and move deals.
- Book appointments.
- Send product cards and service packages.
- Send quotations.
- Create follow-up tasks.
- Follow up on open conversations.
- Hand conversations to your team.

All within the prices, products and rules you set.

06 — USP 2: YOUR TEAM STAYS IN CONTROL

AI handles the routine. Your team handles what matters.

WANTS — 2BHK interiors · December move-in

DONE — Budget collected · Consultation booked

PENDING — Kitchen requirement

TOLD THEM — Consultation is free

NEXT — Confirm the visit.

Nobody asks the customer the same questions twice.

07 — HANDOVER & ESCALATION

When a person needs to step in, the AI knows.

The conversation can move to the right person based on:

Stage · Reason · Language · Deal value · Availability

- 15 min → Reminder
- 30 min → Next person
- 45 min → Manager

- 60 min → One honest holding message

08 — QUOTE TO CASH

From conversation to payment.

Quotation → Invoice → Payment

A customer asks for the price. The deal progresses. A quotation is prepared. The customer accepts. An invoice is raised. Payment is recorded.

The sales journey doesn't end at "interested".

09 — FOLLOW-UP

Every enquiry answered. Every open deal followed up.

The AI follows up around what is still open — not with a vague "just checking in".

- Stops when the customer replies.
- Stops when a booking happens.
- Stops when the customer opts out.
- Stops when a salesperson takes over.
- Creates a task when human action is needed.

10 — LANGUAGE

Your customer speaks their language. So does iSuite AI.

Tamil · Tanglish · English · Hindi · More

Text · Voice notes · Photos

11 — SAFETY & CONTROL

The AI works inside your rules.

- Will not invent a price.
- Will not invent a product.
- Will not give an unapproved discount.
- Will not say something is booked without checking.
- Will not keep talking after your team takes over.
- Will not overwrite recorded customer details.

You decide what it knows, says and can do.

12 — META ADS DIFFERENTIATOR

Which ad brought the money?

Ad → Enquiry → Conversation → Deal → Won → Revenue

See your ad spend beside the revenue generated by the customers it brought.

Send qualified and won outcomes back to Meta.

13 — PRODUCT SCREENS

Everything your sales team needs. In one system.

01 — Shared Inbox

02 — AI Sales Assistant

03 — Sales Pipeline

04 — Bookings

05 — Quotations

06 — Follow-ups

07 — Invoices & Payments

08 — Meta Ads

09 — Automations

10 — Reports

14 — WHO IT'S FOR

Built for businesses where customers message before they buy.

- Real Estate
- Interiors
- Education & Coaching
- Clinics
- Travel
- D2C
- Distributors
- B2B Services

If your customers message you before they buy, iSuite AI fits the way you sell.

15 — DEMO

See iSuite AI with your own sales journey.

45-minute live walkthrough.

- How your enquiries enter.
- How the AI responds.
- How qualification works.

- How appointments are booked.
- How your team receives handovers.
- How quotations and invoices work.
- How follow-ups happen.
- How Meta Ads connect to revenue.

16 — FAQ

Will my WhatsApp number get banned?

iSuite AI connects through Meta's official WhatsApp Business Platform. Your account must follow Meta's rules, and Meta decides account status.

Will the AI make up prices or discounts?

No. It works from the products, packages, prices and rules you provide. Discount or exception requests can go to a manager for approval.

Does iSuite AI replace my sales team?

No. The AI handles routine conversations, qualification and follow-ups. Your team takes over when human involvement is needed.

What languages can it handle?

Tamil, Tanglish, English, Hindi and more, depending on the customer's language and your setup.

Are Meta charges included?

No. Meta charges separately at Meta's rates. WhatsApp messaging charges are separate from MnT Future charges.

How long does WhatsApp approval take?

Typically 1–2 weeks, subject to Meta's review.

Do you message people without consent?

No. iSuite AI is designed to message people who have opted in, and opt-outs are respected.

Is Meta approval guaranteed?

No. WhatsApp Business and Meta advertising approvals are decided by Meta.

17 — FINAL CTA

Your next enquiry is already waiting.

Make sure it doesn't wait for your team.
